IP DECT Mobility Solutions

Overview

The IP DECT solution delivers all the benefits of IP-based converged communications with the convenience of in-building wireless communications.

Designed to support a large numbers of users—up to 120 handsets and 32 base stations—the IP DECT system enables users to carry a wireless phone and get full access to the features they are accustomed to using at their desk phone. (Avaya recommends that for full feature functionality the 3701 and 3711 handsets be used with the IP DECT solution.)

The IP DECT solution, which connects to the IP Office using a variant of the H.323 protocol, can support users in different offices that are connected via a WAN. An IP DECT cordless handset can travel from one office to another, making and taking calls.

Capabilities

Features available on the 3701 and 3711 handsets include:

- Speakerphone
- Illuminated display and keypad
- Phone number lists
- Mute capability
- Ring tones
- Voice Mail indication
- Multiple menu languages
- Headset connection
- Vibrating alarm

Benefits

The IP DECT solution delivers the productivity-boosting benefits of IP and wireless communications across multiple offices in a convenient, lightweight handset.

Avaya Advantage

Extend the reach of your communications and your investment with Avaya IP wireless DECT phones.
